PASO DEL NORTE REGION
Nestled in the southwestern part of the United States lies a large stretch of land known as the Paso del Norte region. This region represents areas of west Texas, southern New Mexico, and northern México. Combined it is one of the largest regions along the U.S./México border.

M. Elena Acosta, SoAHEC Program Coordinator
JOINING BORDERS TO BUILD A STRONG AND HEALTHY REGION

Since 1996, the Paso del Norte Health Foundation has served the health needs of the people living in the Paso del Norte region. This unique and diverse region represents communities in west Texas, southern New Mexico, and Ciudad Juárez, México. Because the region covers three states and two countries, there is a special interweaving of cultures, environment, and economic conditions that must be considered when dealing with the 2.2 million people living in the area.

While the region has prospered, there are many challenges that contribute to serious health problems. Poor nutrition, sedentary lifestyles, obesity, tobacco use, and diabetes are just a few of the risk factors that prevent residents from living healthy lives.

The Foundation is working with organizations to bring the needed resources and education to each segment of the region. Community organizations are the building blocks for assisting those in need. We value their work and dedication, and invite you to learn about three organizations in the region that are working within their community to enrich the lives of the people they serve.
The theme of the 2004 Annual Report addresses bringing together communities along the border to build a strong and healthy region.

Covering over 16,000 square miles of beautiful mountains, picturesque deserts, peaceful farmlands and orchards, as well as large metropolitan areas and smaller cities is a terrain known as the Paso del Norte region. This region brings together boundaries of El Paso and Hudspeth Counties in Texas, Doña Ana and Otero Counties in New Mexico, and Ciudad Juárez in México, which is the service region for our Foundation.

This topography, while diverse, shares many health and economic similarities. In a recent Behavioral Risk Factor Survey, 40% of El Paso County families reported incomes of less than $25,000 per year, in Doña Ana County there were 49% of families with income less than $25,000 per year, and in Ciudad Juárez, México the average family income per year is less than $5,000. Area residents also share many of the same health problems as there is an increasing number of individuals that are obese, diabetic, and live in unhealthy environmental conditions.

The Foundation within the past nine years has funded over $85 million dollars to address the health issues of the region. When the board approves a grant, our staff develops a request for proposal and it is then announced throughout the region. We are delighted to see the many creative grant proposals submitted from the different organizations and geographic areas. The strategies differ because each organization is familiar with their community and has identified the most effective tool in responding to their areas health needs.

Without the effort from these fine organizations, our work at the Paso del Norte Health Foundation would be impossible to accomplish. Their commitment and hard work for disease prevention and health promotion is crucial in bringing good health to our region. I would like to extend my thanks to all these organizations for all their efforts in making our region a healthier place to live.
MISSION

The mission of the Paso del Norte Health Foundation is to effect long-term improvements in the health status of the population in the greater El Paso region through education and prevention.

VISION

We envision a greater El Paso region where all people have the knowledge, resources, and environment they need to live healthy lives; where health problems are prevented, and there is access to primary care; where people on both sides of the border live in clean, safe environments with fresh air, potable water, and the proper disposal of waste.

HISTORY

We were created on October 1, 1995 from the proceeds of the sale of Providence Memorial Hospital to Tenet Healthcare Corporation. With $130 million in assets from the sale, we became one of the largest private foundations on the U.S. - México border that serve the 2.2 million people living in the Paso del Norte region of El Paso and Hudspeth counties in far west Texas, Doña Ana and Otero counties in southern New Mexico, and Ciudad Juárez, Chihuahua in northern México.

WEB SITE

The Paso del Norte Health Foundation’s web site is one of the easiest, most accessible tools to find the latest information regarding the Foundation. The bilingual site features information on the funded initiatives, upcoming activities, and a variety of helpful tips regarding your health and wellness. Visit us at www.pdnhf.org.
“Our mission is to provide local communities in Doña Ana and Otero counties with a variety of educational and prevention tools that help equip community members in the delay or prevention of the onset of diabetes and its related risk factors.”

Benjamín Jáquez,
Interim Director
In Las Cruces, New Mexico, one organization is educating the community on the importance of diabetes prevention.

**Southern Area Health Education Center**

New information shows that of the 1.8 million people living in New Mexico, approximately 120,000 adults have diabetes. More alarming is that one out of every three people with diabetes doesn’t know that they have it. Hispanics and Native Americans are at a higher risk than others in this area.

To bring awareness of this deadly disease, one organization is reaching out and educating communities in Doña Ana and Otero counties of New Mexico on the importance of reducing the risk factors associated with diabetes. **Southern Area Health Education Center (SoAHEC)** serves as a culturally competent regional resource and training center for youth, health workforce, and communities in southern New Mexico. SoAHEC provides education and prevention programs on a variety of community-health related topics that include nutrition, obesity, and diabetes. The concept of “Train the Trainer” is used for a variety of health professionals and community members to learn new concepts and improve their teaching skills to make more of a direct impact on those individuals that have diabetes or are susceptible to the disease.

Supported by the **Border Diabetes Initiative** of the Paso del Norte Health Foundation, SoAHEC has implemented bilingual training opportunities to build local community capacity in diabetes prevention. Proper nutrition and healthy cooking, becoming physically active, how to prevent diabetes, and how to best manage the disease once diagnosed are some of the programs in place. The overall goal of SoAHEC is not just to have organizations send out messages on diabetes prevention and awareness, but also to involve students, parents, and community residents in an effort to affect long-term changes in the region through policy development.
“Children have fun in the KidFit program. Games and lessons are easy to follow, which keep children excited and active. A strong exercise program that starts at an early age can prove to be as valuable to a child’s success as a first-class education. It is important that parents play an active role in preventing childhood obesity and sedentary lifestyles.”

J. Carlos Jauregui, KidFit program director
Children in El Paso, Texas are making healthy food choices and staying active after-school.

YWCA El Paso Del Norte Region

An obesity epidemic has invaded the health of children across the country. Fast food and video games have replaced the recommended nutrition and exercise needed to stay healthy.

YWCA El Paso Del Norte Region (YWCA) is helping efforts by bringing knowledge and understanding on the importance of healthy eating habits and exercise to school-aged children in the KidFit after-school program.

Over 5,000 children from sixty-five elementary schools in El Paso and Hudspeth County of Texas are participating in this program. The KidFit curriculum uses fun activities to motivate children in 30 minutes of physical activity a day, and two nutrition lessons a week.

To better comprehend what kind of minerals are in foods, children play an activity similar to musical chairs. Each child is assigned a food product and asked to make a circle around a group of chairs (one less than the number of participants). As the children walk around the group of chairs, a volunteer calls out a food product and participants rush to find a seat. Those seated must identify what mineral their food product contains and the benefits it provides to the body before they can move to the next level. The selected group recites that calcium helps build strong bones and teeth, and it is a dairy product found in milk, yogurt, and cheese. The lesson learned is that minerals are as important as vitamins and are needed to grow and develop healthy bodies.

The Paso del Norte Health Foundation and the YWCA are working together to educate school-aged children, parents, and families on changing bad eating habits into healthy food choices and staying active. This collaboration and the success of the program have opened opportunities to expand the program to other areas of the region.

KidFit is designed to decrease the sedentary lifestyle of school-age children and improve awareness of proper nutrition and diabetes prevention among children and their families.

UTEP
College of Nursing
El Paso, Texas
“We work hard to offer children and their families’ specialized education, nutrition and health recommendations. Children receive love and support from our staff to help in their development.”

Catalina Castillo
OPI Director
Individuals and families are empowered to be promoters of their own development in Ciudad Juárez, Chihuahua, México.

**Organización Popular Independiente, AC**

The family plays a vital role in the health of a child. Nurturing and caring for loved ones at any age contributes many benefits that lead to positive health outcomes. Yet, several families in west Ciudad Juárez lack the resources and skills to care for their children’s health.

As a community-based organization, **Organización Popular Independiente, AC (OPI)** works with individuals and families in building a strong foundation to improve their health and quality of life. Community development projects, promotion educator trainings, environmental health programs, parenting education, and other related services are provided for the community.

OPI recognizes and responds to the needs of parents and other caregivers for raising healthy children. With OPI’s original education model, family members and other caregivers learn how to nurture and raise children in an emotionally supportive and safe environment. Skills to advance children’s psychological, physical, and social development from birth to three years of age are emphasized through this education.

Through the assistance of the Paso del Norte Health Foundation’s **Begin at Birth Initiative**, over 96 young children and their families in west Ciudad Juárez, México are supported annually. These families benefit from learning about the importance of early stimulation and creating positive outcomes for their child’s development.

**How We Make Grants**

The Paso del Norte Health Foundation does not accept unsolicited grant proposals. However, when we launch a new initiative, we typically host grant workshops for nonprofit organizations to better understand the purpose of the initiative and how to respond to our request for proposals.

Our program officers are always available to discuss ideas for future initiatives and welcome suggestions from regional organizations. For more information about upcoming grant workshops, please call the Paso del Norte Health Foundation at (915) 544-7636 or visit our web site at www.pdnhf.org.
A Smoke Free Paso del Norte $3.3 million
Approved in July 1999
The American Cancer Society and other agencies in the Paso del Norte region work to reduce smoking. Top priorities include reaching kids, making cessation programs widely available, and promoting smoke-free environments. The initiative also strives to reduce the smoking rate among youth, pregnant women, people living with small children, and those who lack the resources to provide for their own wellness.

Technical Advisors:
Texas A&M School of Rural Public Health • University of Houston Health Science Program

Partners:
American Lung Association • American Cancer Society • Centro San Vicente • Texas A&M Colonias Program • Children in Need of Services, NM

Action for Youth $12 million
Approved in September 1998
Action for Youth (AY) is a grassroots initiative building community capacity for neighborhood transformation, and promotes adolescent health. AY features the development of "Action for Youth Partnerships" in El Paso, southern New Mexico and Ciudad Juárez. Partnerships are actively sought within the education, business, faith, non-profit, parent and youth sectors. AY supports the strengthening and building of "developmental assets," essential building blocks that protect youth and foster healthier life outcomes.

Juárez)

Ageless Health $4.5 million
Approved in January 2000
The Ageless Health Initiative is designed to develop or expand volunteer-based projects to support the promotion of Independent healthy living and the prevention of isolation for persons 60 years of age and older in the Paso del Norte region, and to effect attitudinal change about aging.

Technical Advisor:
Rio Grande Council of Governments Area Agency on Aging

Bike/Walk Paths $778,000
Approved in January 1998
The Bike/Walk Paths plan is designed to leverage with City, County, and State to build safer areas to exercise.

Border Diabetes $3.5 million
Approved in May 1999
The Border Diabetes initiative is designed to increase the awareness of diabetes risk factors and provide prevention education to reduce the impact of diabetes in El Paso, Doña Ana and Otero Counties, and Ciudad Juárez, Mexico. The initiative has three components: implementation, design and analysis of diabetes prevalence and behavioral research; educational interventions; and public awareness.

Partners:
Westway Clinic Satellite of Centro de Salud Familiar – La Fe, Inc. • Centro San Vicente Clinic • FEMAP • NMSU • Project VIDA • Southern Area Health Education Center • U.S.-Mexico Border Health Association

CATCH $4.2 million
Approved in March 1997
The Coordinated Approach to Child Health (CATCH) is a school-based program that facilitates a coordinated approach to health education at the elementary school level, providing students with a comprehensive curriculum with consistent health messages about nutrition, physical activity, and tobacco avoidance.

**Walk El Paso**
Approved in November 1997
The walking initiative is a broad-based effort to inspire and mobilize the sedentary population to begin a simple walking program. Walking 20 minutes a day, three times a week is the principle message. Non-profit organizations help by coordinating walking groups and special events throughout their communities.

**Walk El Paso Partner:**
YMCA of Greater El Paso

---

**Healthy Homes and Handwashing**
Approved in May 2000
The Healthy Homes initiative addresses household environmental health risks related to such problems as indoor asthma triggers: inadequate water, sanitation, and hygiene; trash handling and management; use of pesticides; lead poisoning; and hazardous household chemicals. The Handwashing program teaches pre-school children in day care settings how to properly wash their hands for protection from communicable diseases and environmental contamination, with the intent of establishing life-long hygiene habits. Day care providers are intensively trained to teach specific handwashing skills using the most effective methods identified in previous pilot projects.

**Partners:**
- Keep El Paso Beautiful
- Migrant Clinicians Network
- UTEP Center for Environmental Resource Management (CERM)
- YWCA El Paso Del Norte Region

**Herbal Safety**
Approved in July 2001
The Herbal Safety initiative is designed to develop an extensive educational program for both health care providers and the general public to assist in the promotion of prudent herbal product use in the Paso del Norte region.

**Partner:**
- UTEP/UT Austin Cooperative Pharmacy Program

---

**Center for Border Health Research (Center)**
Approved in January 1998
The purpose of the Center is to ensure a sound, well-defined research agenda and enhance efforts to pursue that agenda leading to improvements in the health status of the Paso del Norte community. The Center provides educational forums for regional health investigators, administers grant funding, and conducts research in the Paso del Norte region.

**Partners:**
- UTEP
- TTU Health Science Center – El Paso
- UT HSC at Houston School of Public Health – El Paso regional campus
- NMSU

**Healthy Communities**
Approved in July 1997
Healthy Communities is a grassroots initiative that addresses health through community-based groups and their stakeholders. Using a broad definition of health, the root causes of illness are identified and targeted, including social and economic factors that impact health. Community-based councils use a mix of approaches and techniques to achieve their goals, including coalition building, conflict resolution, consensus building, asset mapping, and continued support for the development of community assets.

**Technical Advisor:**
- Non-Profit Enterprise Center

---

**Medical Student Fund**
Approved in October 2002
The Medical Student Fund initiative is a grant/loan program that aims at improving the doctor/patient ratio in El Paso and its surrounding area. The loan encourages capable, yet financially unable, students from the Paso del Norte region to attend the Texas legislative approved four-year medical school in El Paso. Upon completion of the program, students that remain and establish their practice or work in a health-related field in the region will have their loans forgiven over a five-year period. Additional funding will be required from the community to emphasize the strong level of support for the medical school.

**Partners:**
- TTU Health Science Center – El Paso
- The Cimarron Foundation
- The Wolslager Foundation

**Qué Sabrosa Vida**
Approved January 1999
Qué Sabrosa Vida is designed to affect the short and long-term health status of the general population of the Paso del Norte region through the promotion of healthier eating habits and the development of tools and skills to sustain permanent behavioral changes. The goal of the program is to increase awareness of a lifestyle that includes healthy nutrition and physical activity, while keeping within the rich tradition and cultural aspects of the Mexican-American border diet.

**Technical Advisor:**
- University of Texas School of Public Health Human Nutrition Center

**Paso del Norte Physical Activity Initiative**
Approved July 2003
This initiative is designed to support physical activity programs that aim to decrease the sedentary lifestyle of adult individuals who are considering or actively making plans to exercise or start a physical activity program. As a multi-year initiative, it will provide capacity, building for community-based programs and offer on-going professional technical assistance through communication, community outreach and mobilization, special events, and evaluation components.

**KidFit**
Approved April 2003
The KidFit program is designed to encourage kids and their families to make healthier eating choices as well as encourage increased physical activity. The program is implemented in 65 after-school sites run by the YWCA El Paso Del Norte. The program consists of one nutrition class and three physical activity classes per week. The nutrition classes are designed to give kids an active approach to learning subjects such as the food guide pyramid, vitamins, and food safety. All physical activity classes stress the individual benefits of each activity, which include coordination, stamina, and improved health.

INDEPENDENT AUDITOR’S REPORT

To the Board of Directors of
Paso del Norte Health Foundation

We have audited the accompanying statement of financial position of Paso del Norte Health Foundation (a nonprofit organization) as of December 31, 2004 and 2003, and the related statements of activities and cash flows for the years then ended. These financial statements are the responsibility of the Foundation’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Paso del Norte Health Foundation as of December 31, 2004 and 2003, and the changes in its net assets and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

4. EXCISE, DEFERRED TAX AND DISTRIBUTION REQUIREMENTS

The Foundation is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. In accordance with the provisions of the Tax Reform Act of 1986, the Foundation is subject to an excise tax on net investment income, including realized gains as defined in the Act. In addition, the Foundation is subject to different taxes related primarily to differences between the bases of certain assets (investments) for financial and tax reporting.

The provision for taxes for the year ended December 31, 2004 consisted of the following:

| Current tax | $124,235 |
| Deferred tax | 491,371 |
| **Total provision for taxes** | **$615,606** |

The deferred tax liability in the statement of financial position created from the above differences is reported on the accompanying statement of financial position at December 31, 2004 as follows:

| Net deferred tax liability (non-current) | $491,371 |

The Foundation is required to make qualifying distributions (as defined in the Internal Revenue Code of 1986) equal to its minimum investment return, as adjusted (as defined in the IRC). Management believes that these distribution requirements will be met in the coming year.

5. PENSION PLAN

The Foundation established a Simplified Employee Pension Plan (the “SEP”) under section 408(k) of the Code that covers all full time employees over the age of twenty-one (21). The Foundation contributes a percentage of employees’ annual compensation to the SEP that is placed in an IRA plan with Aetna Life Insurance and Annuity Company. During 2004 and 2003, the Foundation contributed approximately $110,817 and $50,190, respectively, to the SEP. The Foundation also established a tax deferred annual plan (the “Plan”) under section 403(b) of the Code with Aetna Life Insurance and Annuity Company. Eligible employees who wish to participate in the Plan may enter into a salary reduction agreement not to exceed the lesser of $3,000 or one-fourth of their base salary during any calendar year. During 2004 and 2003 employees contributed approximately $50,765 and $46,653, respectively, to the Plan.

6. GRANTS

The Foundation accurses the long-term portion of grants payable at their net present value. At December 31, 2004, the Foundation’s short-term obligations totaled $8,359,504. The accrued future obligations consisted of the following:

| 2006          | $8,396,105 |
| 2005          | 5,689,849 |
| 2004          | 2,480,244 |

7. COMMITMENTS AND CONTINGENCIES

Leases

The Foundation leases its primary facilities under operating leases that will expire in 2009. Both leases provide an option to renew for one period of thirty-six months. Future minimum annual lease payments are as follows:

| 2005 | $145,236 |
| 2006 | 145,236 |
| 2007 | 145,236 |
| 2008 | 145,236 |
| 2009 | 80,515 |

Less discount to net present values $641,459

These financial statements include expense related to these leases for 2004 and 2003 in the amount of $130,915 and $134,958, respectively.

Malpractice and General Liability Insurance

The Hospital was self-insured for purposes of providing for comprehensive general and hospital malpractice liability risk. The Hospital had a claims-made excess coverage policy to supplement its self-insured insurance fund. The Foundation continues to be responsible for the self-insured general liabilities and hospital malpractice risks of the Hospital relative to operations prior to the sale.

The Hospital and the Foundation may be involved in certain litigation arising in the ordinary course of business for services provided through September 29, 1995. Claims arising after September 29, 1995 are covered by Aetna by virtue of our current insurance policies and are not reported in these financial statements. As of September 30, 1995, insurance provided by Aetna to cover claims arising from services provided to patients through September 29, 1995.

In the opinion of management, however, estimated malpractice and general liability costs accrued at December 31, 2004, are adequate to provide for potential losses resulting from pending or threatened litigation. These accruals include costs associated with known claims as well as those incurred but not reported discounted at 8% and are reported as accrued general and professional liabilities in the statement of financial position.

The Foundation contracted with MMJ Risk Management Resources, Inc. to administer all of the general and hospital malpractice liability claims for Providence Memorial Hospital.

The Foundation continues to be self-insured for general liability claims against the Hospital for services provided through September 30, 1995. Accordingly, the Foundation purchased tail insurance coverage for a five-year period from American Continental Insurance Company. Their terms are $2 million aggregate per event and $4 million aggregate total. At the aggregate coverage was renewed at the end of 1998, the carrier has assumed responsibility for all expenses and indemnity up to their $15 million limit.

Employment Related Claims

During 1991, the Hospital began self-funding for the purpose of providing for claims for employment-related injuries. The Hospital established a reserve for known and unknown claims. Additional claims may be asserted against the Hospital from time to time through September 29, 1995. In the opinion of management, however, estimated workers’ injury costs accrued by the Foundation at December 31, 2004, are adequate to provide for potential losses resulting from pending or threatened claims.

Third-Party Cost Reports

During the year ended December 31, 2003, the allowance for probable losses related to disputed items on certain third-party reimbursements claimed in previous Hospital cost reports was recognized as other income based on management’s belief that it is no longer probable that such claims will be pursued.

A. RELATED PARTY

In 2003 the Board of the Foundation formed a non-profit entity, Center for Border Health Research (CBHR). The Foundation’s Board appointed the first Board of Directors of CBHR, but a majority of the replacements will be elected by their own Board. As the Foundation will not exercise control of this organization, the financial information of CBHR has not been consolidated in these statements.

The Foundation manages various administrative services to CBHR. During the years ended December 31, 2004, and 2003, CBHR received services valued at $154,239 and $86,000, respectively.

B. RECLASSIFICATION

Certain reclassifications have been made to the prior year notes in order for them to be consistent with the current year presentation.
